

Assessment of Program Effectiveness – Student Learning Outcomes

Year: 2008)

Department:

Engineering Technology

Degree Program:

Safety and Fire Protection Engineering Technology

Learning Outcome Goal:

1. Who have a sound background in analysis, problem solving, applied design, the implementation of fire safety, protection and prevention, hygiene, and managerial skills.

3. With strong social skills, able to work in a team environment, competent in communications and information presentation, and with strong sense of professionalism and ethics.

4. Who are immediately employable and productive from the first day in the work place, and are committed to continuous improvement and life long learning.

Assessment Procedure (Describe which goal is being assessed, assessment procedures used, identify who conducted the assessment and the date on which it was completed):

All assessment procedures are established and described in the **Continuous Improvement Plan, Safety and Fire Protection Program**. This plan was defined and implemented in the Spring of 2007. Data was collected for all assessment criteria in the fall of 2008. All steps prescribed in the plan were performed during the semester. The Engineering Technology Department will perform the established tasks each future semester.

Assessment Results and Interpretations (Be as specific as possible):

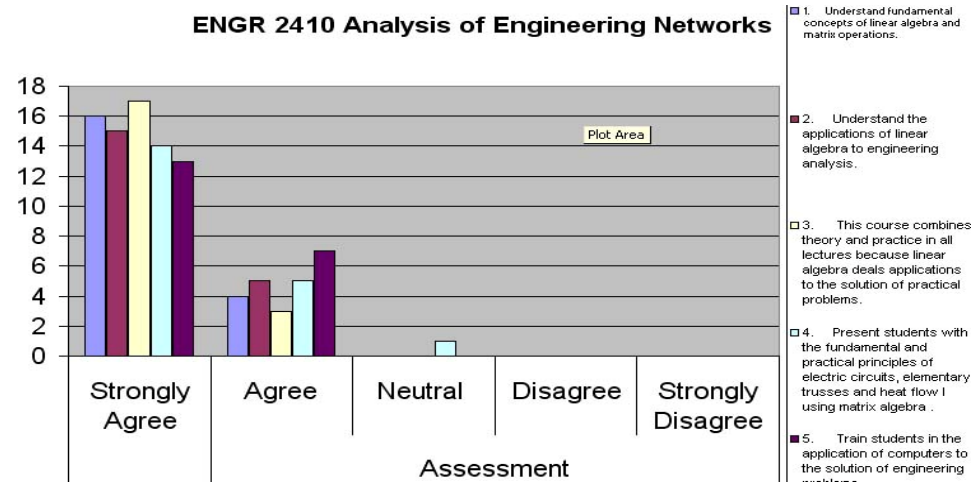

The following assessment tasks were performed in the Fall 2007:

Exit interviews

Assessment of program goals by graduates

Assessment of course outcomes. For all courses offered.

Assessment Sample

Use of Results: (Indicate when and how the results were discussed by program faculty, what assessment-based decisions were made regarding the program, and timeline for implementing any changes approved by the faculty. Include dates of actions taken).

Discussions of assessment results between faculty and Program coordinator.

Implementation of corrective actions when necessary.

Sharing of assessment results with the Industry Advisory Board.

Meeting Notes (*List dates of meetings when assessments results were reviewed and analyzed and decisions made regarding how results could be used to improve program quality. Beginning in 2008, the attached meeting notes template should to record what took place at all assessment meetings. Meeting notes are to be maintained by the Department.*)

Emails documenting sharing of assessment results with the Industry Advisory Board are in the files of the Engineering Technology Department
