Bridge Plan - External Partnerships Work Group

Objective 1. Enhance Awareness of UHD as a Quality Institution of Higher Education Among Key Internal & External Stakeholders

Framing Story Outline

- University of Houston-Downtown faculty members expand their academic reach beyond the classroom ... and beyond campus ... through proactive media relations. Through the pitching and placement by members of the University Relations team, faculty experts are able to share their knowledge on health, politics, history, psychology, criminal justice, education, popular culture and a number of other topics. The presence of UHD professors on television, in print media and on National Public Radio demonstrates the breadth of expertise at the University and reminds prospective students that UHD is indeed a quality institution of higher education. In addition to professors appearing in the media, student leaders and administrators have contributed insights on topics affecting the community and higher education in general. Through strategic media relations efforts, media sources have repeatedly sought expertise and commentary from the University Community. Likewise, news outlets have turned to UHD as a host for televised events focused on issues that impact both local and national landscapes. In calendar year 2018, the University earned nearly $25 million in advertising values from news mentions and more than 300 articles were shared nearly 200,000 times across social media platforms such as Facebook and Twitter. During that year, more than 100 faculty expert interviews were placed directly by UHD’s University Relations team.
