Notes from Student Access Subgroup meeting to review strategies 11/4/19
In attendance: Sandra Dahlberg, Ashley Rosebrough, Chris Stempinski

The purpose of the meeting was to examine the concept of student access and to identify strategies listed under objectives that might be consolidated.

Comments:
The strategies are tasks, in business practice language, as opposed to values. Tasks will get done. For example, Strategies 1.1, 1.3, and 1.4 could be eliminated.
Language in strategic plans tends not to be so detailed.
For Objective 3, Increase graduate, international, and adult enrollment, increasing international enrollment may be difficult for a time due to political climate

We distilled strategies to the following:

1. Recruit student body that reflects the diversity of the Houston Metro region
   a. Outreach to area high schools
   b. Seamless transfer from community colleges
   c. Graduate:

2. Provide students/prospective students with sufficient financial aid packages

3. Create an inclusive community that supports students’ educational goals

4. Increase the number of on-campus jobs for students

5. Provide face-to-face, online, and hybrid instruction to meet diverse student needs.

Suggestion for a framing statement: We are educating the leaders of tomorrow that reflect the Houston community. Who are we serving and who do we want the student body to be?
