What is a Bachelor of Business Administration in Supply Chain Management?

Students working toward a degree in Supply Chain Management (SCM) will prepare to navigate their way through the various parts of the supply chain. You will learn and develop the skills needed to identify, acquire, access, transport or position, and manage the various goods and resources necessary for an organization to meet the demands of its internal and external customers. Success in SCM requires effective communication and coordination throughout the supply chain network. Increased cost demands and levels of competition have placed a greater focus on high level SCM as a competitive necessity.
