

Schedule of Upper-Level Biology and Microbiology Courses

Courses Offered Every Semester

BIOL 3303/3103	General Genetics and Lab
BIOL 3306	Biologic Evolution
BIOL 4210	Biology Seminar
BIOL 4320	Cell Biology
MBIO 4210	Microbiology Seminar

Courses Offered Fall Semesters

BIOL 3305/3105	Human Anatomy and Lab
BIOL 3306	Biological Evolution
BIOL 3307/3107	Introduction to Neuroscience and Lab
BIOL 3308	Cancer Biology
BIOL 3330/3130	Plant Biology and Lab
BIOL 3340/3140	Biology of Fungi and Lab
BIOL 4220	Introduction to Genomics and Bioinformatics
BIOL 4230	Adv. Lab. in Cell & Molecular
BIOL/CHEM/GEOL 4260	Environmental Laboratory and Field Studies
BIOL 4303	Human Genetics (<i>Spring semester only</i>)
BIOL /MBIO 4313/4113	Parasitology and Lab
BIOL 4340	Animal Behavior
BIOL/CHEM 4344	Principles of Pharmacology and Toxicology
MBIO 3320	Virology
MBIO 3340	Environmental Microbiology
MBIO 4340/4140	Medical Microbiology and Lab
BIOL/GEOL 3430	Coastal Studies (alternating fall semesters with GEOL 4401 Biogeochemistry)

Courses Offered Spring Semesters

BIOL 3302/3102	General Ecology and Lab
BIOL 3304/3104	Vert. Embryology & Lab
BIOL 3310/3110	Plant Identification and Lab
BIOL 3320/3120	Human Physiology and Lab
BIOL 4232	Cell Biology Lab
BIOL 4310/4110	Histology and Lab
BIOL 4330	Molecular Biology
BIOL 4360	Environmental Biology
BIOL 4390/4190	Natural History of Vertebrates and Lab
MBIO 4310	Microbial Biotechnology
MBIO 4320/4120	Immunology and Lab
MBIO 4330	Microbial Genetics

Courses Offered Every 3rd Semester (beginning fall of 2014)

BIOL /GEOL 4301	Evolution of the Earth and its Inhabitants
-----------------	--------------------------------------------
