eIntelligence Fall 2016 Changes

If you use eIntelligence by Argos as part of your work process, you may have noticed a recent change in the interface. After performing an upgrade on the application, the Login page and the dashboard area now have a different look.

**Login Page**

The first change in the application involves the login page.

The original login page looked as follows:
The new login page looks as follows:
The original module entry area had the following appearance:
