**Select Group Members**

With the new All Users page, instructors creating one group or a group set can now search and select the members much faster.

**Add Members to a Group**

1. Inside the course, go to Users and Groups. Expand the list and click on Groups.

2. Hover over Create, and select Manual Enroll. Note: It does not matter if it is a single group or a group set.

3. Click on Add Users.

4. A smaller window will appear with the class roster.
5. Check the box next to their names and click Submit.

6. Repeat steps 3 through 4 to any remaining groups.
