

## AI RESISTANT ASSESSMENT: A Simple Design Formula

---

### THE FORMULA

---

Context-Specific Question **+** Course-Specific Anchor **=** AI-resistant Assessment

### WHAT DOES THIS MEAN?

---

#### Context Specific Question

- Cannot be answered well from the assignment instructions alone if copied into a Gen-AI app
- Requires students to draw on course context

#### Course Specific Anchor

- Directs students to concrete evidence unique to the course
- Examples: textbook sections, lecture concepts, datasets, videos, case studies, class discussions

### EXAMPLE

---

What specific section of Chapter 1 relates to what happened between the wives in Video 10? Explain your rationale using terminology from the text and a minute marker from the video.
